Free Flight Day 3 Recap

Day 3 of Free Flight's forecast was for 10 mph winds from the southwest in the morning, swinging around to west by noon, and then northwest by late afternoon. The temperature was expected to reach approximately 90° with a chance of thunderstorms most of the day.

The flightline stayed in the same location as the day before because of the forecasted wind directions and thunderstorms.

AMA, NFFS, and FAC events were flown on Wednesday.

The pilots' meeting was at 7:45 a.m., with a focus on having fun, but most importantly, *safety*.

Approximately 1:30 p.m., a windy thunderstorm rolled across the field. During the storm, someone measured a wind speed of 26 mph, but judging by the tent damage, the speeds must have been much higher.

Many people packed up and left for the day, and others stayed or visited the museum—hoping the storm would pass. Indeed it did at roughly 4 p.m. and a few people put up flights in the Gas and Rubber

classes.

In Catapult Glider, Paul Wicks recorded the only pre-storm max. After the storm, Catapult Glider had quite the showing and several other maxes were flown. Event Director Jim Buxton said that more than 90% of the flights were recorded in the closing hour after the storm. Paul Wicks assisted Jim with the scoring frenzy at the end of the day.

Stan Buddenbohm topped 27 other fliers to win Open, and Brittany Avera won Senior. The top three Juniors (starting with first place) were Connor Vucovich, Kyle Gerspacher, and Ian Wicks.

F1B was on hold after the fifth round because of the weather, but picked back up for round 6 at 5 p.m. Four fliers are maxed out, and the flyoff will be Thursday morning if the conditions are favorable.

Bill Vanderbeek won Early 1/2A Nostalgia Gas with the only max out. Ten other fliers competed in this popular event.

Dan Berry won AB Classic Gas and C Gas with scores of 722 seconds and 749 seconds, respectively. Bill Jennings Jr. won

the increasingly popular E-36 electric event.

Gene Smith had the high time of the day in A Nostalgia Gas with a score of 1,163 seconds.

Because there were so many people flying Catapult Glider at the end of the day, the awards were presented to the winners. The awards ceremony for the other events was postponed because many fliers left after the storm. There will be a double awards ceremony on Thursday.

Your *NatsNews* reporter weathered the storm in a popup camper and hoped that it would not be damaged or blown away. In the high winds my dad, Joe Mekina, and his friend, Andre Mellin, were called in as extra anchors so the camper didn't get blown over. Their efforts were successful. We only had to pick up a few items that had blown out into the field. Some of the tents were reportedly not as lucky.

Thank you to all who volunteered and made today such a success despite the weather conditions.

reporter/photographer

Bob Hanford with his event-winning F1P model.

Bernard Guest came well prepared for the F1B event.

John Yost with a pair of Catapult Gliders.

Dick Hall, of Athens AL, takes time out to pose with his A Gas model.

Brian Pacelli in the final stages of winding his F1B aircraft.

Free Flight

A picture-perfect launch!

Bill Shailor gets another great launch in F1B.

Jean Paillet and his furry copilot Kishka.

Jim Buxton, Catapult Glider event director, congratulates Stan Buddenbohm. Most of the other top finishers flank them to the right.

John Clapp with his F1B.

Pat Murray, from Indianapolis, gets ready for the FAC event, Old-Time Stick.

Robert Marier readies his rubber model while his sister, Hannah, waits ready on the golf cart.

A group of talented Catapult Glider fliers debates some of the finer points of the event between flights.

Stan Buddenbohm was the winner of Catapult Glider.

Rocco presents Dave Gerspacher with a "replacement" model to make good for the model that he ran over.

Free Flight

Dave and Kyle Gerspacher. Kyle took second in the Junior division. Also, Kyle's score bested that of his father's in the Open division. David had a rough day. His primary model collided with a chase vehicle.

David Jones, of Pittsburgh, with his colorful gas aircraft.

Joe Mollendorf returns from a flight.

Frannie Masterman, our NFFS treasurer, takes time out to fly Catapult Glider.

Denny Dock, ever present, seems to always have an airplane in his hands!

Bud Romak.

Free Flight

Jim Buxton recording Caroline Johnson's flight times. Her mother, Elizabeth, is the Free Flight NatsNews reporter.

Aiden Johnson, age five, from Cincinnati, flies in his first official event: Catapult Glider. Andre Mellin is coaching Aiden to help him perfect his technique.

Aram Schlosberg shows the details of his F1B's flight-control timer and propeller. Aram said, "This is [a] beauty."

Joe Mekina, Andre Mellin, Elizabeth, Aiden, and Caroline Johnson set up an assembly line to turn out a couple of Catapult Gliders for Aiden and Caroline's first official event. This year was the third year with no Builder of the Model (BOM) rule for this event. Most competitors still build their own models, but it offers a great opportunity for new fliers to get involved in this event.

THE PEN
 (DEFINED BY CONES)
IS FOR OFFICIAL FLIGHTS ONLY.

1. ONLY WHEN READY TO FLY SHOULD YOU GET INTO THE PEN.
2. THE BUFFER ZONE (DEFINED BY FLAGS & CONES) IS TO HELP DISTINGUISH WHEN A CONTESTANT IS IN OR OUT OF THE PEN.
3. THE BUFFER ZONE IS OFF LIMITS! NO STANDING OR READING AIR IN THIS AREA.

"The Pen" sign. The Pen has been a popular way of corralling glider fliers and giving them the experience of a center stage as they are flying.

Joe Mollendorf explains to Aiden Johnson how a dethermalizer works.

Jim Buxton, event director, near the Catapult Glider scoring tent. This tent was damaged by the afternoon thunderstorm's high winds. The excellent AMA maintenance crew is going to piece together enough tents for our needs for the rest of the week.

The team logo for the winning Catapult Glider team.

The top three teams in Team Catapult.

Kids enjoying the endless stream of bubbles from a contestant's bubble machine used to detect thermals. It's a simple technique. If the bubbles go up, there is a thermal and it is time to fly. If they are going down, there is a downdraft and it is time to wait. Hopefully, those bubbles start going up!
